

QUALITY AND SOLID PERFORMANCE THAT LASTS.

As the industry's best-selling pedicure spa, our Forte Spa has long set a performance standard for reliability from the ground up. From its durable exterior design and plush upholstery to its versatile operational features and proven engineering, this pedicure spa has achieved a solid reputation for long lasting performance. In addition to obvious styling advantages, the Forte Spa offers you a wide selection of options, allowing you to customize the chair to your specific needs. Like décor options including more than 500 possible color combinations. And your choice of European Touch's patented Crystal Clean Pipe-Free™ technology which provides an invigorating water massage for the entire foot, or our traditional piped foot bath with two adjustable jets. Or built-in, seat-back massage options like vibration with heat or our exclusive roller massage and vibration combination. If tried and true performance and a wide range of custom features are among your primary objectives, this beauty could be your Forte.

The standard-traditional seat cushion offers vibration massage w/heat, and a pillow-top surface for the ultimate in comfort.

Purchase the left and right side trays for client conveniences or to perform manicure services. Add the center tray to provide extra space for a laptop PC or magazine.

The electronic remote allows the client to effortlessly recline and slide the seat with the push of a button.

State-of-the-art sanitation control European Touch's patented, self-contained Crystal Clean Pipe-Free™ technology offers advanced sanitation control. This innovative technology replaces outdated piped and jetted systems that can more easily harbor bacteria, oil or other debris when not properly cleaned. An integral component of this pipe-free system is the contoured chromed footplate in the basin with quick-release knobs for easy removal and cleaning between client visits. The footplate also houses the custom water impeller that provides a deep invigorating water massage for the entire foot.
Crystal Clean Pipe-Free technology is available as an upgrade on the Forte Spa.

You can upgrade your spa with the optional roller massage cushion that provides both built-in massage rollers and vibration for true versatility.

Resilient upholstery will withstand most chemicals, including acetone.

Armrests open to provide easy entrance into the chair and also allow extra seating space if needed.

The comfortable footrest adjusts in three positions.

The convenient hand sprayer makes rinsing the basin quick and easy.

Conveniently located controls are within easy reach for the technician.

The Forte Spa comes standard with traditional piped whirlpool-style foot bath, featuring a quality, whisper quiet pump motor and multi-directional jets for complete client comfort.

Forte Spa Color Palette The Forte pedicure spa comes in a palette of over 500+ color combinations, allowing you to customize your chair to your salon's décor and environment. Additionally, cushion covers and side panels can be changed should you desire different colors in the future.
